### **RESPONSIBLE SOCIAL DISTANCING**

Thank you everyone for embracing our social distancing requirements. Working together we can help minimize the virus from getting into our complex. Remember to limit lift usage to upward trips if you can and only one household in the lift at a time. If someone is already in the lift, just wait for the next trip or take the stairs and get the exercise quota dealt with. Do please remember to take wipes with you to the lift/letterbox/bin room. Wipe going in and going out. Wash your hands as soon as you get home.

With the relaxation of the rules and increased use of the common areas, please still be careful and vigilant. Enjoy your weekends away now that we can travel in Queensland again! Support the tourism industry that is suffered so severely with the isolation and bans on movement out of our homes.

### **EVELYN STREET DRIVEWAY AND BIN ROOM ACCESS**

This month with the assistance of Mark Jackson (U13), the committee have been investigating systems to limit the unwelcome use of our Evelyn Street Bin room access driveway by a constant stream of deliveries and removalists for Newstead Series. Why worry about it, you may ask?

Our industrial bins are emptied Monday to Saturday and the Brisbane City Council Rubbish Truck often can not get access to the bins and loading bay because of vehicles not associated with Newstead Terraces parked in the way. Added to this our particular truck driver has a very short temper/patience/tolerance level and will snap a picture of the offending vehicle and drive on to his next destination. Our rubbish remains uncollected and festering.

The solutions being investigated next Thursday by the committee include remote controlled boom gates or remote controlled chain gates, for which the Brisbane City Council will have a remote control.

### **REPLACEMENT POOL FURNITURE**

Our pool side lounge replacements have been on order since February this year. They come from the Philippines and the company that manufacturers them has had it production impacted by Covid19. They are still on the production line in the Philippines.

**Stay safe and well. Look out for your neighbours. Give them a wave. WE ARE ALL IN THIS TOGETHER.**
